5. Bidders must be either proprietary business or partnership firms, or registered companies or any other legal entities also having good experience in software developing work are eligible to compete in their own names in the bid and accordingly a contract will be executed with such bidder by IIML.

Refer Page No.16 for technical bid evaluation and scoring pattern.

(C) Evaluation:

(1) Technical Bid Evaluation process:

- (i) The bidder has to score at least the minimum marks of 70 in the components of technical evaluation in order to be technically qualified. The evaluation will be made as per the parameters specified in the Technical Bid.
- ii) The financial bid would be opened only those bidders who have scored minimum 70 marks in the technical evaluation out of 100.
- iii) The technical bid as a whole would carry 70% weightage in the overall bid evaluation.

(2) Financial Bid Evaluation Process :

(i) The financial evaluation shall be carried out and financial bids of all the bidders shall be given 30% weightage. This means that the technical bid as a whole will have 70% weightage. This further means that marks received in technical bid out of 100 will be multiplied by 0.7 while arriving the final figure.

(ii) The valid Bidder (fulfilling criteria in 2 (i) above with the lowest price shall be assigned value of 30 (i.e., 30% x 100).

(iii) If the bidder having lowest price has of Rs.10,000/- then financial value of the other bidders shall be computed as under :

$(30 \times \text{Lowest Bid Price} / \text{Quoted bid price})$

(iv) The value of Financial bid shall be as given in Illustration - 1 below :-

Illustration-1: If the bidder has quoted 12500/- as its price bid then its financial value is $30 \times 10000 / 12500 = 24$

(3) Final valuation and ranking:

i. The total value of bidder for ranking shall be as given in Illustration-2 below:-

Illustration – 2: If the bidder in Illustration 1 whose technical evaluation marks is 35 then its total marks will be $35 + 24 = 59$.

ii. The Bidders' ranking shall be arranged depending on the values obtained by each of the bidder both in Technical Evaluation and Financial Evaluation.

iii. The bidder with highest value (Technical plus Financial evaluation) shall be deemed as the L-1 Bidder for award of contract.

iv. In case of two or more bidders having same scores, in that case highest financial turnover (average) during last three year will be finalized and shall be awarded the contract.

D) Purpose and scope of the Software:

The software will be used as:

- a) An interface for Student - Placement Committee - Recruiters
- b) A tool to store and process information related to Placements (Application information, Firm information, Offer information, Student information)
- c) Bring in greater automation for the shortlist processing, application processing and offer processing
- d) A tool to generate reports from database about shortlists, offers and students.

(E) System Summary:

There are 2 independent portions of current system

1. Student-Placement Committee-Recruiter portal
2. On the Day software

The first part handles application opening (job posting), CV Freezing & CV access, Shortlist and offer processing, Student Feed.

The second part handles Shortlist entry, Student's preference entry, Company preference entry, scheduling, etc.

This FRS covers only the first portion of the current system.

(F) Process Requirements

1.1.1 Portability and Accessibility

The application should be portable and accessible from different devices such as laptops, tablets and mobiles (Operating systems such as Android, Apple iOS, Windows). It should support Chrome browser

1.1.2 Capacity

The system should have the ability to handle 1000+ logged in users and 200+ external users (recruiters). The design should be scalable to 1400+ logged in users and 400+ external users for future additions

1.1.3 Security

The system should have proper security and data encryption. It should provide access based on login credentials and no unauthorized access to any form of data should be possible.

1.1.4 Logging

The system should log all manual activities including in sufficient detail and a structured manner for referring in case of any inconsistencies. There should be provisions to raise alerts in case certain predefined activities are logged. The log should be easily accessible to the handling team as and when required.

1.1.5 Availability

The system should be able to recover from temporary losses of connectivity and resume the operations from where it stopped after verification of data integrity.

1.1.6 Deadline sensitivity

All schedules set within the software should be sensitive to 1 second and the machine time should be synced with IST periodically.

1.1.7 Error Handling

Proper error handling should be implemented and the application should be able to handle and notify about all runtime errors.

1.1.8 Data Migration

Uploading / migration of existing admission data to the Automation Software may be provided by the firm/vendor

1.1.8 Functional requirements:

Roles section to be absolutely customizable in terms of providing different access to all of the following types of users:

Role	User (s)	User Interface	No. of users
Student	IIM L Student	Frontend	800+
Senior Placement Team Member	Placecommer	Backend	20+
